

NAME

ovs-parse-backtrace – parses ovs-appctl backtrace output

SYNOPSIS

ovs-appctl backtrace | **ovs-parse-backtrace** [**<binary>**]

ovs-parse-backtrace [**<binary>**] **<backtrace>**

DESCRIPTION

In some configurations, many Open vSwitch daemons can produce a series of backtraces using the **ovs-appctl backtrace** command. Users can analyze these backtraces to figure out what the given Open vSwitch daemon may be spending most of its time doing. **ovs-parse-backtrace** makes this output easier to interpret.

The **ovs-appctl backtrace** output must be supplied on standard input. The binary that produced the output should be supplied as the sole non-option argument. For best results, the binary should have debug symbols.

OPTIONS

- **--help**

Prints a usage message and exits.

- **--version**

Prints the version and exits.
