Unit Test Debugging Utility

OVS/OVN 2021 Fall Conference

Vasu Dasari, Master Engineer, HPE/Plexxi

Executing Testsuites

- OVS has different test suites to test features in different environments
 - `make check` # Basic Checks
 - `make check-system-userspace`
 - `make check-kmod`
 - `make check-dpdk`

When a testsuite fails ...

```
# ----- ##
## openvswitch 2.16.90 test suite. ##
## ----- ##
768: tunnel - Geneve option present                                FAILED (tunnel.at:936)

## ----- ##
## Test results. ##
## ----- ##

ERROR: 1 test was run,
1 failed unexpectedly.
## ----- ##
## testsuite.log was created. ##
## ----- ##

Please send `tests/testsuite.log' and all information you think might help:
```

To: <bugs@openvswitch.org>
Subject: [openvswitch 2.16.90] testsuite: 768 failed

You may investigate any problem if you feel able to do so, in which case the test suite provides a good starting point. Its output may be found below `tests/testsuite.dir'.

What's next

- Log files at test execution directory
 - For example: _build-gcc/tests/testsuite.dir/0768
- Examine artifacts to reconstruct the problem
- Difficulties in debugging a failure
 - Testsuite exits and tears down setup on failure
 - No easy way to examine the system in failed state
 - Difficult to run gdb to debug the problem
 - Recreate test setup manually

Pause on Failure – OVS_PAUSE_TEST

- Environment variable to control pause-on-failure
 - Via make
 - \$ OVS_PAUSE_TEST=1 make check TESTSUITEFLAGS='‐v 768'
 - Via run
 - \$ cd _build-gcc/tests/testsuite.dir/0768
 - \$ OVS_PAUSE_TEST=1 ./run
- Examine the switch in a different terminal
 - \$ export OVS_RUNDIR=/home/vdasari/Developer/ovs/_build-gcc/tests/testsuite.dir/0768
- Once done resume the testcase for completion from the main window

Pause on Failure – OVS_PAUSE_TEST

```
$ OVS_PAUSE_TEST=1 make check TESTSUITEFLAGS=' -v 768 '
Making check in datapath
Making check in linux

## openvswitch 2.16.90 test suite.
## -----
768. tunnel.at:905: testing tunnel - Geneve option present ...
../../tests/tunnel.at:906: ovsdb-tool create conf.db
$abs_top_srcdir/vswitchd/vswitch.ovsschema.
.
.
=====
Set following environment variable to use various ovs utilities
export OVS_RUNDIR=/opt/vdasari/Developer/ovs/_build-gcc/tests/testsuite.dir/0768
Press ENTER to continue:
```

Inspect switch

```
$ export OVS_RUNDIR=/opt/vdasari/Developer/ovs/_build-gcc/tests/testsuite.dir/0768
$ ovs-ofctl dump-flows br0
cookie=0x0, duration=1.172s, table=0, n_packets=0, n_bytes=0, priority=3,tun_metadata2=0 actions=drop
cookie=0x0, duration=1.172s, table=0, n_packets=0, n_bytes=0, priority=2,tun_metadata1 actions=IN_PORT
cookie=0x0, duration=1.172s, table=0, n_packets=0, n_bytes=0, priority=1,tun_metadata0 actions=output:p2
$ ovs-vsctl show
8693786e-15ed-4b62-a753-8b4a16a2f45f
    Bridge br0
        fail_mode: secure
        datapath_type: dummy
        Port br0
            Interface br0
                type: internal
        Port p2
            Interface p2
                type: dummy
        Port p1
            Interface p1
                type: geneve
                options: {remote_ip="1.1.1.1"}
$ ovs-appctl ofproto/list-tunnels
port 6081: p1 (geneve: ::->1.1.1.1, key=0, legacy_l2, dp port=6081, ttl=64)
```

More Debug Options

- Run gdb on daemons in failed state
 - `sudo gdb `which ovs-vswitchd` `pidof ovs-vswitchd``
- Inspect and execute commands from namespaces created
 - `ip netns list`
 - `sudo ip netns exec at_fp0 ping 10.1.1.100 -c`
- Run appctl commands for packet tracing
 - `ovs-appctl ofproto/trace ovs-dummy
'tunnel(tun_id=0x0,ipv6_src=2001:cafe::1,ipv6_dst=2001:cafe::2,ttl=64),in_port(4789)'`

Resume testcase – Press ENTER

```
===== export
OVS_RUNDIR=/opt/vdasari/Developer/ovs/_build-gcc/tests/testsuite.dir/0768
Press ENTER to continue:

768. tunnel.at:905: FAILED (tunnel.at:936)

## -----
## Test results.
## -----
## 

ERROR: 1 test was run,
1 failed unexpectedly.
## -----
## testsuite.log was created.
## ----- ##

Please send `tests/testsuite.log` and all information you think might help:

To: <bugs@openvswitch.org>
Subject: [openvswitch 2.16.90] testsuite: 768 failed
```

You may investigate any problem if you feel able to do so, in which case the test suite provides a good starting point. Its output may be found below `tests/testsuite.dir`.

In summary ...

- Enables easy and iterative development process
- Enables Test Driven Development model
- OVS Documentation
